

# CCC Expert View

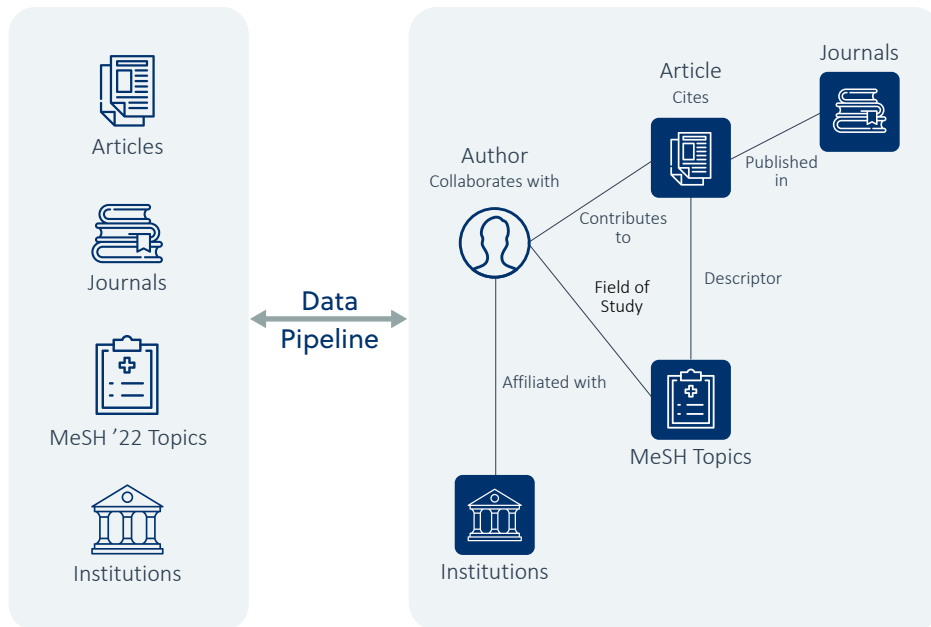

Data you can trust. Insights you can act on.

Draw actionable learnings from a large volume of interconnected data to identify qualified experts in a domain of research.

Knowledge graphs enable medical affairs, clinical affairs, human resources, marketing and others to find leading experts and key opinion leaders in relevant fields so your company can expand your collaboration network, hire top talent and engage speakers to present authoritatively about your products.

CCC's Expert View facilitates exploration of hundreds of thousands of authors, including interconnections between them, their publications, and areas of interest. CCC's data-driven approach provides a novel view into expert networks, uncovering professionals who aren't already working with your competitors.

- Data pipelines with a learning architecture reliably disambiguate author and institution data
- Intuitive interface makes it simple to filter and focus on large data sets
- See the most prolific authors and then delve deeper to view collaborator relationships and publications

## Powerful capabilities:

Validate information on known experts

Discover KOLs for a topic of interest

Explore an expert's network

## Why CCC?

At CCC, we help companies manage vast amounts of published content and proprietary internal information and data. We are experts in processing data from nearly all major publishing houses and metadata aggregators accounting for more than 120 million unique records per year across a diverse set of industries.

Over 900 life science companies use CCC's RightFind suite of products to discover and gain insights from scientific content while simplifying copyright compliance.
