

RightFind Navigate benefits

RightFind Navigate

Personalized search across multiple sources of data and information for highly relevant discovery

R&D-intensive companies must accelerate research and drive innovation to compete effectively, but when content is locked away in silos it hinders discoverability and slows research. To maximize the value of digital information, organizations must eliminate silos to make content more discoverable and accessible.

RightFind Navigate breaks down inefficiencies caused by information silos to reveal connections and insights that drive innovation. RightFind Navigate securely unifies licensed content, publicly available data sources, and internal proprietary information through an open ecosystem to maximize return on content and data investments.

Enable users to find relevant content faster using public, licensed, and custom vocabularies

Get relevant content at the right time with personalized results

Centralize content discovery and access

Maximize the value of your organization's content and data investments

Support copyright-compliant collaboration

Powerful capabilities to drive innovation

Unify data sources

Eliminate data silos to increase awareness of content resources, including public, licensed, and proprietary internal resources to maximize the value of your digital information assets with flexible pre-built or custom data connectors that enable fast, secure access to content and data.

Personalize the search experience

Find relevant content faster. RightFind Navigate uses explicit and implicit personalization powered by machine learning to incorporate user activity across the RightFind suite to deliver content recommendations specific to each user. Users can also turn personalization on and off.

Smarter information discovery

Perform aggregated search via a single unified search experience that displays the data most meaningful to users and enables connections across multiple data sources.

Enable insights

Explore information relationships with dynamic visualizations to accelerate insights by making information connections and enriching the R&D pipeline with new ideas.

Semantic search

Identify relevant documents with an expanded search that incorporates synonyms from the MeSH vocabulary. Navigate's open ecosystem supports vocabularies and synonyms from licensed, publicly available, and custom vocabularies and semantically enriches indexed and API-based data in real time. Semantically enriched visualizations provide highlights of relevant topics and the main semantic topics in your search results to enable additional insights.

Topic interactions

Filter your search results by topics in the Analytics pane to explore how topics co-relate and quickly get the information you want.

RightFind Navigate is part of CCC's RightFind Suite — a set of integrated, flexible software solutions that enable professionals at R&D-intensive companies to search, discover, access, read, share, organize, collaborate on and analyze content to generate data-driven insights that give their organizations a competitive edge.

About CCC

A pioneer in voluntary collective licensing, CCC (Copyright Clearance Center) helps organizations integrate, access, and share information through licensing, content, software, and professional services. With expertise in copyright and information management, CCC and its subsidiary RightsDirect collaborate with stakeholders to design and deliver innovative information solutions that power decision-making by helping people integrate and navigate data sources and content assets.
